

I have just sent a second amended file for the FEC report due 2/20/2008. The receipts amount had a slight adjustment. When transferring information from the old software to the new some of the receipt information was missed. The information had to be entered manually. Below are the states that were affected. Here are the states that were affected CA, IA, IL, IN, MO, NC, NH, OR, and SD.

4 receipts had the incorrect share percentage

1 receipt was deposited in the administrative account, but posted to the political account (this one may affect the itemized receipts column)

2 receipts were debits that were posted to the wrong state association

2 receipts were posted to the wrong PAC (as you know we have six)
